

For this monologue, I have a website of riddles in front of me, and I will be trying my hardest to crack all of them. We start with apparently 'easy riddles'... No actually, I got the first riddle from some other place, but the rest are easy. Apparently. Not fascinating writing but when it comes to honesty? Fab! Soooo, here comes the first riddle, that I call...

Riddle number 1: I can fly but have no wings, I can cry but have no eyes. What am I?

What are you? I think a blind person jumping out of a plane, but who's parachute hasn't opened. I'm just saying if my parachute didn't open, I'd be in hysterics. At very LEAST I'd cry. Sure most blind people have eyes even if they don't work, but there are SOME blind people who don't have eyes, I believe they cry through their ears. So there you go.

Another explanation is a rocket with artificial intelligence human emotions that CAN cry, just not through eyes, rather special gaps or whatever.

Now how close was I? A cloud??? Clouds do not cry! I can't believe I wasted time and effort trying to crack that one, that was really dumb. And clouds don't fly, they float! The thing with clouds is that they often look like all sorts of random shapes, so they could have wings, anyway!

Riddle 2: What has to be broken before you can use it?

Tight trousers? I'm saying if you break clothes that are too tight, you can fit in them. Sure they could end up falling down, but that's what belts are for...

The answer is an egg? Say you want to use an egg so you can grow another chicken. Are you saying you need to be break the egg in that case? No! And who says they use a food when they eat it? Ever heard anyone say 'that's a nice smelling pizza! Can I use it, please?'

Riddle 3: I'm tall when I'm young and I'm short when I'm old. What am I?

A rubbish looking skyscraper that locals get sick of, and demand it gets blown up.

Ah, the real answer is a candle. You don't HAVE to burn them though, so...

Riddle 4: What month of the year has 28 days?

How's that a riddle? It's February!

The answer is all of them? No, I disagree. Say someone asked how old a 35 year old was, and he said 10 years old. Would that be the right thing to say? I mean he'd have lived 10 years technically speaking, but that really would be a dumb answer!

Riddle 5: What is full of holes but still holds water?

Damaged bottles hold water technically speaking, just not for long. Judging by the last riddle, I'm guessing my answer was right.

The answer is a sponge? Well sponges don't hold water forever either, so there you go, I was right just then.

Riddle 6: What question can you never answer yes to?

'If you say 'yes' I will kill you. So, what do you think?'

The answer is 'Are you asleep yet?' You can talk in your sleep!! Another riddle that's wrong!

Riddle 7: What is always in front of you but can't be seen?

Everything for a blind person works. No wait, I think I know this one, I've heard it before! Time!

Whoops, the answer is the future. I was close though. Having said that, there are some cultures that say the future is behind them, as you can't see the future. That's true!

Riddle 8: There's a one-storey house in which everything is yellow. Yellow walls, yellow doors, yellow furniture. What colour are the stairs?

There are no stairs!! Riddle truly cracked for the first time (apparently)! However... If someone asks you how many stairs there are in any building including a bungalow, you should assume there is the possibility of stairs and people aren't tricking you. You have to trust people.

Riddle 9: What can you break, even if you never pick it up or touch it?

Anything if you have a gun?

Ah, a promise.

Riddle 10: What goes up but never comes down?

A rocket leaving Earth?

The answer is your age? Time travel will make this riddle obsolete one day...

Riddle 11: A man who was outside in the rain without an umbrella or hat didn't get a single hair on his head wet. Why?

He was bald?

Yep, right again. However, I heard that bald people do actually have hairs on their heads, they're just microscopically small. Although having Googled that, that seems to be wrong. Maybe I made it up.

Riddle 12: What can you keep after giving to someone?

You can give someone something, then rob them, taking the item back. So you can keep basically anything after giving it to someone. Or is the answer something cheesy, like your heart??

The answer is your word. Ok. Not cheesy, but I wasn't a million miles away.

Riddle 13: I shave every day, but my beard stays the same. What am I?

A guy who shaves only his head!!

Ah the answer is a barber. Well I'm sure barbers take at least some days off so, doesn't really work does it?

Riddle 14: You see a boat filled with people, yet there isn't a single person on board. How is that possible?

You're schizo!

The answer is all the people on the boat are married. Oh. Fair enough.

Riddle 15: You walk into a room that contains a match, a kerosene lamp, a candle and a fireplace. What would you light first?

I guess the match? Does that make me a fool?

The answer is the match, lol! That was a dumb riddle, I can't believe I wasted a few minutes pondering on that one...

Riddle 16: A man dies of old age on his 25th birthday. How is that possible?

Well, 25 would be old for him as it's his last age, isn't it?

Ah, the answer is he was born on February 29 and leap years only happen every four years. I guess I got cocky and believed in myself too much. No, you know what, I was right. The riddle was wrong, as people born on leap years still celebrate their birthday every year don't they? Unless their parents really suck...

Riddle 17: I have branches, but no fruit, trunk or leaves. What am I?

A bank!

Yep, I got that one right. Woohoo.

Riddle 18: What can't talk but will reply when spoken to?

Some mute guy that uses a computer to talk for him.

The answer is an echo? Well walls don't really reply, do they? Another schizo riddle, there.

Riddle 19: The more of this there is, the less you see. What is it?

A blindfold!

Oh, the answer is darkness. I guess that makes more sense as all blindfolds have the same effect or at least should do. No, you know what? The thicker a blindfold is, the more it works, surely. I was right, yet again. :O

Riddle 20: David's parents have three sons: Snap, Crackle, and what's the name of the third son?

He's called 'What's'...

Whoops, the answer is David, again I was pretty confident with my answer. Apparently that's a riddle for kids, as are the following. :S

Riddle 21: I follow you all the time and copy your every move, but you can't touch me or catch me. What am I?

Has to be a shadow...

The answer is YOUR shadow. I guess it's easy to catch someone else's shadow. Let's skip to the harder riddles... No actually you know what? Having read those apparent riddles for children, they must be for children with IQs of 200. No need to skip them. Here goes...

Riddle 22: What can't be put be put in a saucepan?

I dunno. A house?

Answer: It's lid? I guess that makes sense, but so does pretty much everything.

Riddle 25: It belongs to you, but other people use it more than you. What is it?

Ideas? Has somebody been stealing my work? I hope not.

Answer: Your name? No, actually I use my name quite a lot. In my Eurovision contest blog I said my name over and over again. People who know me on the other hand say 'hello' and don't even bother saying my name... Powned.

Now we move onto the funny riddles, apparently.

Riddle 26: What has lots of eyes, but can't see.

|||||

The answer is a potato? I don't even know what that means. Oh potato eyes are growths on the foods. Is that funnier than the prior riddles? Haven't noticed too much or a difference, tbh.

Riddle 27: What has many needles, but doesn't sew?

A porcupine!

Ah, the answer is a Christmas tree. I suppose I'd be more surprised if I saw such a tree sewing but come on, any animal sewing would be really weird.

Riddle 28: What has hands, but can't clap?

A clock!

Yep, that was right. You could make a clapping clock if you really wanted to, though.

Riddle 29: What has one head, one foot and four legs?

Ok, I have no idea.

The answer is a bed? Does my bed really have a foot and a head? I find that creepy.

We're still in the funny riddles, apparently. Again, I can't really see any difference whatsoever.

Riddle 30: What is cut on a table, but is never eaten?

I've never liked fish...

The answer is a deck of cards? Oh, I'm sure there is someone out there who eats decks of cars, believe me.

I wonder how many of these I'll do. I'll probably just stop when I get bored.

Riddle 31: What has words but never speaks?

A book?

Yep, that was an easy one though. Personally I wouldn't call that a riddle. It is a fact, though. A funny fact? Hm. Let's move onto the math riddles. Sadly I know next to nothing about the subject.

Riddle 32: What three numbers, none of which is zero, give the same result whether they're added or multiplied?

1, 2 and... I dunno. 5.

It's one two and three? Yeah, I'm not sure if I understood the question. I was close, but I think I fluked that.

Riddle 33: Mary has four daughters, and each of her daughters has a brother. How many children does Mary have?

Four!

Oh, it's five. Whoops.

Riddle 34: Three doctors said that Bill was their brother. Bill says he has no brothers. How many brothers does Bill actually have?

Zero! You have to trust people!

Oh that was right! Not because of my reasoning though. Bill apparently has three sisters.

Riddle 35: Two fathers and two sons are in a car, yet there are only three people in the car. How?

One father is a grandfather?

Wooooohoo, I got that right. Is that because I've heard the riddle before, though? I will never know for sure.

Riddle 36: The day before yesterday I was 21 and next year I will be 24. When is my birthday?

Have you like, time travelled or something?

Answer: December 31; today is January 1. I'll take your word for that. Sounds plausible, who knows.

Riddle 37: A little girl goes to the store and buys one dozen eggs. As she is going home, all but three break. How many eggs are left unbroken?

Three?

Yep, that was right. You can't trick me you know? I am on to you...

Riddle 38: A man describes his daughters, saying "They are all blonde, but two; all brunette but two; and all redheaded but two." How many daughters does he have?

Six??

It's three. :(

Riddle 39: If there are three apples and you take away two, how many apples do you have?

One.

Oh, it's two. You tricked me. No actually, you haven't. What if you throw the two apples in the bin? Then you don't have two apples, and that's what happened in my

head. Prove me wrong.

Riddle 40: A girl has as many brothers as sisters, but each brother has only half as many brothers as sisters.

How many brothers and sisters are there in the family?

Sorry, I don't know. Apparently it's four sisters and three brothers. I don't like these kind of puzzles, so we move onto word riddles!

Riddle 41: A word I know, six letters it contains, remove one letter and 12 remains. What is it?

Frteen. Sounds like thirteen and so it works? I have to admit I don't fully know what I meant by that, so I'll move on. The real answer is 'dozens.' I wouldn't have got that, so I don't feel frustrated. :)

Riddle 42: What would you find in the middle of Toronto?

An o? Surely it can't be that easy? And what kind of riddle is that? That IS the answer!! I don't understand...

Riddle 43: You see me once in June, twice in November and not at all in May? What am I?

E!

Woo, got that one right!

Riddle 44: Two in a corner, one in a room, zero in a house, but one in a shelter? What is it?

R. It's more or less the same riddle...

Yep, got that right.

Riddle 45: I am the beginning of everything, the end of everywhere. I'm the beginning of eternity, the end of time and space. What am I?

Yep, same riddle once again. E.

Right, NOW I'm bored of this monologue. I could have ended on a rounder number than 45, but the number does have its charms. Just not as much as a pali... No Simon, no! You have to thinking about palindromes, it's annoying! You've been talking about them for years now, and it was creepy as flip the first time! Do you really want to make another apology monologue? Do you? Because they're getting annoying too! Anyway, to sum up, many riddles can be answered by simply saying 'a paradox' but that has to be cheating. An interesting thought to ends things, though. And... bye!
